Committee under Art, 17 of annual meeting of 15,17 had

no report of progress to date.

Committee under Art. 18 of annual meeting of 1917 reported in writing by R. K. Clark.

Mr. Moderator-

Your Committee appointed to consider the sewerage pro-

blem for the town submit the following report:

E. Worthington, Civil Engineer of Dedham, was engaged at a cost of \$250.00 to make a general survey and study of the town, and the Committee recently received his report together with plans and estimates of the cost of construction. Mr. Worthington's report in substance is that the central portion of the town is all that need be seriously considered, as the section known as Rockville is so sparsely settled that a sewerage system need not be considered, and if at any future time the problem should present itself, it would be cheaper and wiser to treat it as a separate system with its own disposal area in the vicinity of the Charles River. And the same situation is true of much of the town's area along the

Charles River and that portion drain by Boggastow Brook, much of this territory being sections of large farms and country residences, which do not require sewers.

While Mr. Worthington's plans are for all of the socalled central section of the town, they also show a certain area which Mr. Worthington recommends for immediate construction. This area is comprised of

Parnell Street.

Adams Street.

Curve Street.

Exchange Street from Main to Union St.

Lavender " " Plain to Union St.

Plain " " Lavender to Main St.

Union " Exchange to Parnell St.

allowing all sewerage to assemble at the junction of Union and Water Streets. From this point a drain would run parallel to the railroad track with the disposal area located along the edge of the swamp above Island Street, about a quarter of a mile from the Pumping Station.

It is Mr. Worthington's opinion that the method of disposal best adapted to the conditions would be the sedimentation and digestion of the sewerage in an Imhoff tank with filtration through a filter of broken stone.

The estimated cost of this disposal plant is approximately \$23,000.00, and the cost of the sewers for the area mentioned for immediate construction \$48,000.00, making a total estimated cost for immediate construction of \$71,000.00.

The estimated cost of future extensions is approximately \$34,000.00. These estimates are based on present prices and although they are greatly in excess of prices current two or three years ago, we believe there is not much chance of prices being lower in the very near future.

Mr. Worthington's plans were submitted to the Chief Engineer of the State Board of Health for his approval, and his office advises us that they believe it is quite probable that the soil is such as to enable us to use the regular gravel filter beds which would be considerably less expensive to construct and maintain than the Imhoff tank system. The gravel filter beds being the method used generally throughout Massachusetts.

It is the opinion of your Committee that the area recommended for immediate construction could and should be cut considerably, they believing that the section in the immediate vicinity of the Clicquot Station is positively necessary and your Committee urgently recommends that prompt action be taken to remedy conditions in this section.

Respectfully submitted,

G. G. HOFF,

FRANK S. HOFF,

H. H. CUSHMAN,

ROY K. CLARK;

M. H. CLANCY.

Voted to accept report.

Committee under Art. 16, 1917, none present. Voted the committee be dismissed and a new committee be appointed who shall report within 30 days to the Selectmen.

E. E. Richardson,

Report of Supervisor of Music.

Mr. Albert S. Ames,

Superintendent of School.

In submitting my sixth annual report of the work in music in the schools, I wish merely to say, that the same general plan of work is being followed from year to year, and I feel that the work is progressing favorably, through the active co-operation of the teachers.

The work of the fall term has been somewhat retarded on account of the enforced vacation, but we shall attempt, through added effort, to accomplish the usual results in

music, in spite of the regretable loss of time.

Respectfully submitted,

CARRIEBELLE E. THAVER.

Report of Principal.

Mr. A. S. Ames,

Superintendent of Schools.

The work of the school year of 1918 suffered a serious setback owing to the fact that the schools were closed about four weeks on account of the epidemic; but we should count ourselves fortunate in not having to be closed a much longer time as were schools of many towns,

In the High School there are still maintained three courses of study; college preparatory, general, and commercial. Last fall we obtained the certificate privilege from Worcester Polytechnic Institute, and before the end of the present school year we hope to obtain the same privilege from the New England College Entrance Examination Board.

In June fifteen pupils were graduated from High School, one of the largest classes ever graduated.

I would like through you to extend to the parents of the school children of Millis, a general invitation to visit more frequently the schools, and so keep in touch with the teachers and with the work their children are doing.

I have had faithful support and loyal cooperation from all the teachers and my thanks is due them for it.

Your respectfully,

R. P. CHAMBERLAIN.
